PROFESSIONAL SUMMARY

Full Stack Developer with 3.4 years of professional experience at Wipro delivering enterprise Banking and Finance applications using HTML, CSS, JavaScript, and Bootstrap. After building a strong frontend foundation in production environments, completed an intensive 6-month Python Full Stack program and independently built a fully functional, role-based e-commerce platform using Django, Django REST Framework, MySQL, and JWT authentication — available live on GitHub.

Brings a rare combination: real-world frontend delivery experience + hands-on Django backend development. Actively seeking Python Full Stack / Django Developer roles where both skill sets can be applied to build scalable, end-to-end web applications.

TECHNICAL SKILLS

Backend	Python, Django, Django REST Framework (DRF), REST APIs, Django ORM, JWT Authentication, CBVs, Serializers, Middleware
Frontend	HTML5, CSS3, Bootstrap 5, JavaScript (ES6+), DOM Manipulation, Form Validation, Responsive Design, Flexbox, Grid
Learning	React.js (actively learning — components, hooks, state management)
Database	MySQL, Relational Schema Design, ORM Queries, Migrations
Tools	Git, GitHub, VS Code, Postman, JIRA, ServiceNow, Browser DevTools
Concepts	Agile / Scrum, MVC Architecture, Role-Based Access Control (RBAC), API Integration, CRUD, Incident Management, SLA Compliance

PROFESSIONAL EXPERIENCE

Frontend Developer | Wipro Technologies - Bangalore

May 2022 – Aug 2025 (3.4 Years)

Project 1: Banking Domain Application

Role: Frontend Developer & ServiceNow Developer

Supported and enhanced a banking application used for policy management, customer data handling, and financial transactions.

Key Responsibilities:

- Developed and maintained responsive UI components using HTML5, CSS3, JavaScript (ES6+), and Bootstrap
- Worked on ServiceNow — handling incidents, RITMs, and change requests (CRs) with SLA compliance
- Performed UKRIS transactions including policy creation, amendments, and agency setup
- Automated finance-related report generation, reducing recurring manual effort for the operations team
- Fixed UI bugs and improved user experience based on client feedback and UAT outcomes
- Integrated frontend with backend REST APIs to fetch and update live data
- Participated in Agile ceremonies — daily stand-ups, sprint planning, and retrospectives

Achievements:

- Reduced manual effort significantly through scripted report automation
- Improved incident resolution speed by handling critical production tickets proactively

Project 2: Finance Management System

Role: Frontend Developer & Support Engineer

Worked on an internal finance system for managing financial data, reporting, and operational workflows.

Key Responsibilities:

- Built and enhanced UI screens for financial data visualization and reporting dashboards
- Handled ServiceNow incidents, service requests, and change implementations end-to-end
- Worked on development and testing tasks including ICCI change of address and finance modules
- Performed root cause analysis (RCA) for production issues and delivered permanent fixes
- Coordinated with clients to gather requirements, clarify scope, and deliver solutions on time
- Conducted pre-deployment testing and validation to ensure zero regression

Achievements:

- Successfully delivered multiple change requests within committed sprint timelines
- Improved system stability by identifying and resolving recurring production issues

Technologies & Tools at Wipro:

- Frontend: HTML5, CSS3, JavaScript (ES6+), Bootstrap
 - Platform: ServiceNow
 - Tools: JIRA, Git, VS Code, Browser DevTools
 - Methodology: Agile / Scrum
-

PROJECTS - Python / Django

MCK Constructions ERP System – Role-Based Enterprise Management System - [View on GitHub](#) ->

Tech: Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript, Git, GitHub Desktop

- Designed and developed a modular ERP system with role-based access control (Admin, HR, Accounts, Project Management)
- Implemented HR recruitment workflow with a 5-stage interview pipeline including automated stage progression and decision tracking
- Built financial module for income, expense tracking, and real-time profit calculation using Django ORM
- Developed project tracking system with task-based progress monitoring and dynamic percentage completion logic
- Created responsive UI and integrated multiple modules to simulate real-world enterprise workflow in construction domain

Smart E-Commerce Platform – Role-Based Marketplace System - [View on GitHub](#) ->

Tech: Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript, Git

- Designed and developed a scalable role-based e-commerce platform supporting Customer, Seller, and Delivery workflows
- Implemented JWT-based authentication and role-based access control (RBAC) to secure APIs
- Developed REST APIs using Django REST Framework (DRF) for cart management, order lifecycle, inventory tracking, and user operations
- Designed a normalized MySQL database schema using Django ORM with relational models and optimized queries
- Built a responsive frontend using Bootstrap and JavaScript with dynamic API integration
- Implemented product variant management (size, color, storage, etc.) with real-time inventory tracking
- Applied modular Django architecture with separate apps, middleware, serializers, and class-based views (CBVs)
- Managed end-to-end development lifecycle from design to deployment

C4Tech GSMArena-Inspired Django Web Application - [View on GitHub](#) ->

Tech: Python, Django, MySQL

- Built a server-side rendered web application using Django with multi-app architecture
- Implemented dynamic template rendering and structured URL routing
- Integrated MySQL database with CRUD operations

TRAINING

SDLC Skill Development Center, Coimbatore | Certified

Duration: 6 months

Intensive hands-on program covering the complete Python Full Stack development lifecycle – from backend API development with Django to frontend integration, database design, and cloud deployment.

Curriculum Covered:

- Python – core to advanced: OOP, file handling, exception management, modules
 - Django Framework – MVT architecture, URL routing, views, templates, middleware, class-based views (CBVs)
 - Django REST Framework (DRF) – serializers, API views, authentication, JWT token-based security
 - MySQL & Database Design – relational schema design, normalization, Django ORM, migrations, complex queries
 - Frontend – HTML5, CSS3, JavaScript (ES6+), Bootstrap 5 – responsive UI integrated with Django backend
 - API Testing with Postman – endpoint testing, request/response validation, environment setup
 - Git & GitHub – version control, branching, committing, pushing projects to remote repositories
 - Deployment – deployed project live on PythonAnywhere, environment configuration, static file handling, WSGI setup
-

EDUCATION

B.E – Electrical and Electronics Engineering

Erode Sengunthar Engineering College | 2018 – 2022

CGPA: 8.02

- IEEE President – EEE Association (2021–2022)
-

CERTIFICATIONS

- Python Full-Stack Developer Course - SDLC Skill Development Learning Center, Coimbatore
 - Google Generative AI Fundamentals
 - Habit Flagbearer Award – Wipro
-
