

KARTHIK M

Python Full Stack Developer | Backend / API Developer | Django · DRF · PostgreSQL · React

karthikanban912@gmail.com | +91 6383075553 | Coimbatore, Tamil Nadu, India | devwithkarthik.github.io | linkedin.com/in/karthik912

PROFESSIONAL SUMMARY

Python Full Stack Developer / Backend Developer with hands-on experience building end-to-end web applications and REST APIs using Python, Django, Django REST Framework, PostgreSQL/MySQL, and React.js — including authentication/RBAC implementation, testing and debugging, and deployment on AWS EC2. Brings 3.4 years of overall professional software development experience at Wipro Technologies, delivering enterprise-scale Banking & Finance applications, REST API integration, and production support. Combines real-world enterprise delivery discipline with modern Python full-stack development skills.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), REST APIs, Django ORM

Databases: PostgreSQL, MySQL, SQL, Relational Schema Design, ORM Queries, Migrations

Frontend: React.js, React Router DOM, JavaScript (ES6+), HTML5, CSS3

Tools & Testing: Git, GitHub, Postman, JWT Authentication, RBAC, Unit Testing (UT), Acceptance Testing (AT)

Deployment: AWS EC2, Nginx, SSL/HTTPS, Vercel, Hostinger, PythonAnywhere

Engineering & Process: OOP, DSA, Problem Solving, SDLC, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer I — Wipro Technologies, Bangalore, India

May 2022 – Aug 2025

Role: Frontend Developer | Banking & Finance Domain | HTML5 · CSS3 · JavaScript · Bootstrap · REST APIs · Agile/Scrum

- Developed and enhanced enterprise-scale banking applications supporting high-volume financial and policy-related workflows.
- Integrated frontend applications with backend REST APIs, handling request/response flows and API-driven data validation.
- Implemented features and business requirements across 15+ development tasks, translating functional requirements into maintainable application components.
- Created, executed, and documented Unit and Acceptance Test cases for developed features to validate functionality against business requirements.
- Investigated application defects and production issues through structured debugging and root-cause analysis; implemented fixes and enhancements supporting application resiliency and operational stability while meeting SLA requirements.
- Collaborated with business, QA, development, and cross-functional teams during requirements, development, testing, UAT, and Agile sprint activities across two-week cycles.

PROJECTS

Optimized Fuel Route Finder | Python · Django · DRF · PostgreSQL · React · OpenStreetMap/Leaflet

- Built a route-planning application that calculates optimal routes and fuel station recommendations based on fuel-price optimization and vehicle range/route feasibility.
- Implemented trip feasibility logic using a 500-mile vehicle range and 10 MPG fuel efficiency to calculate refueling gallons, fuel cost, remaining fuel/range, and total trip spending.
- Designed a PostgreSQL schema for fuel-station data and built REST APIs with Django REST Framework to serve route and pricing data to a React frontend with map visualization via Leaflet/OpenStreetMap.

Secure FinTech Payment Platform (Freelance Client Project) | React · Django REST Framework · MySQL · Postman · AWS EC2 · Nginx

- Developed a fintech application supporting credit-card-funded transfers, beneficiary management, payment history, and KYC workflows, with separate user and admin workflows.
- Built REST APIs with Django REST Framework and tested payment, beneficiary, and KYC endpoints using Postman.
- Deployed the application on AWS EC2 with Nginx configuration and SSL/HTTPS setup; used Git-based deployment alongside Vercel and Hostinger for frontend hosting.

Full Stack Job Portal | React.js · Django · DRF · PostgreSQL · Fetch API · Postman

- Built a full-stack job portal supporting user registration, job browsing, job details, and job applications.
- Developed RESTful APIs with Django REST Framework and integrated React using Fetch API, async/await, and JSON request/response handling; validated endpoints using Postman.
- Integrated PostgreSQL with Django and configured CORS middleware for frontend-backend communication.

TRAINING & CERTIFICATIONS

Python Full-Stack Developer Program — SDLC Skill Development Learning Centre | Sep 2025 – Feb 2026

Focused on Python, Django, DRF, React, relational databases, REST APIs, and authentication; continued hands-on project development after completion.

EDUCATION

B.E., Electrical and Electronics Engineering — Erode Sengunthar Engineering College | 2018–2022 (CGPA: 8.02)
