PROFESSIONAL SUMMARY

Python Full-Stack Developer with hands-on experience building database-driven web applications using Python, Django, and MySQL. Developed a role-based e-commerce platform implementing customer, seller, and delivery modules with product variants, cart system, order processing, and inventory management. Skilled in HTML, CSS, Bootstrap, and JavaScript for responsive UI development. Backed by 3.4 years of enterprise software experience at Wipro, bringing strong expertise in debugging, production systems, Agile workflows, and problem-solving. Actively exploring React, Machine Learning and AI tools.

TECHNICAL SKILLS

Frontend: HTML, CSS, Bootstrap, JavaScript, Responsive Design

Backend: Python, Django, Django ORM,

Database: MySQL, Relational Database Design

Tools & Practices: Git, Version Control, GitHub, VS Code, JIRA

PROJECTS

Smart E-Commerce Platform – Role-Based Marketplace System - [View on GitHub ->](#)

Tech: Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript, Git

- Developed a full-stack role-based e-commerce platform using Django supporting Customer, Seller, and Delivery Partner modules with secure authentication and access control.
- Designed a modular multi-app Django architecture for product catalog, cart management, order processing, seller dashboard, and delivery tracking.
- Implemented dynamic product variant management supporting attributes such as color, size, RAM, storage, and inventory stock control.
- Built a session-based shopping cart and order checkout system with automated price calculations and inventory updates.
- Developed seller and delivery dashboards enabling product management, variant updates, order status tracking, and delivery workflow management.

VALMON – Fashion Mart (E-Commerce UI Project) - [Live demo ->](#)

Tech: HTML, CSS, Bootstrap, JavaScript

- Developed a responsive multi-page e-commerce website with reusable UI components
- Ensured cross-device compatibility and interactive user experience

C4Tech GSMArena-Inspired Django Web Application - [View on GitHub ->](#)

Tech: Python, Django, MySQL

- Built a server-side rendered web application using Django with multi-app architecture
- Implemented dynamic template rendering and structured URL routing
- Integrated MySQL database with CRUD operations

JavaScript Mini Quiz Project

Tech: HTML, CSS, JavaScript - [Live demo ->](#)

- Built a dynamic quiz application with real-time validation, timer logic, and score tracking
- Used DOM manipulation and event handling for interactive functionality

Employee Management System (Python Mini Project)

Tech: Python, Tkinter, MySQL

Tools: VS Code, IDLE

- Developed a desktop-based application with secure login and full CRUD functionality
 - Designed database schema and handled data persistence using MySQL
-

TRAINING

Python Full-Stack Developer Course (6 Months)

- Trained in Python, Django, HTML, CSS, Bootstrap, JavaScript, and MySQL
 - Built full-stack web applications with authentication and CRUD functionality
 - Designed and implemented normalized relational databases using MySQL
 - Integrated frontend and backend components using Django templates
 - Used Git and GitHub for version control and project repository management
 - Applied debugging, error handling, and clean coding principles across projects
-

PROFESSIONAL EXPERIENCE

Wipro Technologies - Bangalore, India Experience: 3.4 Years

Mainframe Developer | May 2022 – Aug 2025

- Worked on large-scale enterprise payment processing systems using COBOL, JCL, DB2, and SQL
 - Managed batch job executions, analyzed production incidents, and performed root cause analysis to meet SLA targets
 - Actively collaborated with cross-functional Agile teams using JIRA to resolve defects and deploy fixes
 - Contributed to production releases, system debugging, and operational improvements
-

EDUCATION

B.E – Electrical and Electronics Engineering

Erode Sengunthar Engineering College | 2018 – 2022

CGPA: 8.02

- IEEE President – EEE Association (2021–2022)
-

CERTIFICATIONS

- Python Full-Stack Developer Course - SDLC Skill Development Learning Center, Coimbatore
 - Mainframe Application Programming Certification (2022–2025)
 - Google Generative AI Fundamentals
 - The Complete JCL Course – Udemy
 - Habit Flagbearer Award – Wipro
-

LANGUAGES

TAMIL - Native | ENGLISH - Proficient
